

# SCHOOL WEAR

QUALITY THAT MATTERS

# WELCOME TO OUR SCHOOL WEAR CATALOGUE

---

Since we started way back in 1992, C-Force Textiles have become one of the largest apparel suppliers to the industry, making us one of the country's most popular brands. Almost thirty years later we're still a force to be reckoned with and have worked hard to supply quality garments with great value for all of our customers.

Customer feedback, attention to detail and high quality standards are priorities in all our products. Here at C-Force we've continued to follow this path by evolving and extending our range. Whether it's sportswear, schoolwear, workwear or beyond you'll find something in our range to suit your needs, no matter the season.

As with many well known brands we have adopted the BSCI method to monitor our global supply chain. We work with cotton suppliers that have the OEKO-TEX standard 100 certification which tests every component of a garment for harmful substances before being used in production. We are also members of SMETA – a global audit methodology that gives us a closer look at the labor, health and safety, environment practices and business ethics of our suppliers. It's our continued commitment to not only provide high quality garments, but to ensure we know how every aspect of each garment is made and manufactured.

We're pleased to have you here with us as we continue to meet your specialty apparel needs.

Actual product colour can also vary slightly from shipment to shipment and this is beyond our control. Reasonable allowance of 5% tolerance in sizes, measurements and weights should be allowed when placing your order.

COTTON

A biodegradable, natural fibre, cotton is the preferred textile worldwide. Combed cotton provides a smooth, soft finish giving a superior level of comfort to the wearer.

COTTON/POLY

A blended yarn of Cotton and Polyester (normally 60 - 80% Cotton & 20 - 40% Polyester). This yarn is good for people who like to wear Cotton - the added Polyester helps to give the Cotton strength.

POLY/COTTON

A blended yarn of Polyester and Cotton (normally 60 - 65% Polyester & 30 - 35% Cotton). Poly- / Cotton is a hardy and durable yarn, and good for being relatively wrinkle free and easy care.

RIPSTOP FABRIC

A strong fabric that is made by adding thicker yarns in the warp and weft at regular intervals to make the appearance of small squares/rectangles. The thicker yarn helps to prevent the fabric from ripping. Heavy Ripstop is commonly used in yacht sails. Finer Ripstop used in outdoor clothing and workwear.

COTTON ELASTINE

A blended yarn of Cotton and the elastomeric fibre (generically called Elastane). The most common blend of this yarn is in the 95% Cotton / 5% Elastane. Elastane helps to retain the shape of a garment, and provides extra comfort by being more stretchy than fabrics without Elastane.

QUICKDRY

Made from 100% Polyester, the yarn is saturated with the Quickdry solution and heat sealed onto it. The yarn is then knitted into fabric. Being yarn coated, means the garment will remove moisture from the skin and move it to the surface of the fabric where it will evaporate. Making the garment cool and dry to wear.

MERINO

The hardiest of wool fibre to use in clothing, Merino makes beautiful garments that last a long time. New technology allows this fabric to be machine washed (on a wool cycle with wool detergent). Merino fabric breathes, so is the ultimate comfort in a garment.

DINTEX®

Our brand of fabric that is Microporous - which means it is fabric that has 3 layers which are bonded together. This creates a windproof and showerproof garment, providing excellent warmth and comfort whilst remaining lightweight.

ANTI-PILL

ANTI PILL FINISH  
This is a heat treated liquid coating applied to (normally) 100% Polyester yarn, to help prevent the fibres pilling (forming small balls on the surface of the garment). Always buy Anti-Pill polarfleece.  
ANTI PILL YARN  
A specially formulated new yarn technology developed by C-Force Textiles.

UV40+

This coating helps to block UV rays from penetrating the fabric. The bigger the number, the more the protection level (in line with sunblock ratings in Australia & NZ). Some fabrics (like heavy weight Nylon Elastane) have an in-built UV protection simply from the construction of the fabric. Used in outdoor clothing and workwear.

SHOWERPROOF

Fabrics that are treated with a coating on the inside of the fabric to reduce water penetrating through it. Showerproof allows the wearer to be in light rain for 10-20 mins before water will penetrate through.

WATERPROOF

Using a laminated TPN membrane technology allows this fabric to be fully waterproof and breathable, for the ultimate comfort in wet weather.

WINDPROOF

Fabrics that are treated with a coating on the inside of the fabric to be resistant to wind to provide warmth and comfort.

ANTI-STATIC

This is another liquid coating applied to Polyester yarn, to help stop the conduction of electricity when worn and in contact with other synthetic garments or surfaces.

REFLECTIVE

Using reflective tape in garments gives extra safety when wearing in dull light/darkness, as the wearer is visible.

**DISCLAIMER**  
The product/fabric colour illustrated are matched as closely to the garments as modern printing process will allow. Actual product colour can also vary slightly from shipment to shipment and this is beyond our control. Reasonable allowance of 5% tolerance in sizes, measurements and weights should be allowed when placing your order.
